LISTING OF THE CLAIMS

1-18. (cancelled)

19. (previously presented) A composition consisting essentially of:

- a thermoplastic fluorinated resin X1 or several compatible thermoplastic resins X1 to Xn, wherein at least one of X1 to Xn is fluorinated, and
- at least one block (sequential) copolymer,
- n being an integer equal to or greater than 1,

wherein:

- the block copolymer comprises at least three blocks A, B, and C, wherein each block is either a homopolymer or a copolymer obtained from two or more monomers, the A block is connected to the B block and the B block is connected to the C block by means of a covalent bond or of an intermediate molecule connected to one of these blocks via a covalent bond and to another block via another covalent bond,
- the A block is compatible with the thermoplastic resin or resins X1 to Xn,
- the B block is incompatible with the thermoplastic resin or resins X1 to Xn and incompatible with the A block,
- the C block is incompatible with the thermoplastic resin or resins X1 to Xn, the A block and the B block;

said composition comprising, by weight, at least 50% of the thermoplastic fluorinated resin(s), based on the total weight of fluorinated resin(s) and the block copolymer being at least one block copolymer with a number-average molecular mass (M_n) of greater than or equal to 20,000 g.mol⁻¹ composed of:

- 20 to 93 parts by weight of A sequences,
- 5 to 50 parts by weight of B sequences, and
- 2 to 50 parts by weight of C sequences; and

09/555,672

wherein said thermoplastic fluorinated resin(s) comprises poly(vinylidene difluoride) (PVDF)
and said block copolymer is a poly(methyl methacrylate)-poly(butadiene)-poly(styrene)
triblock copolymer.

20-51. (cancelled)
